(54) ONE PACKAGE COATING COMPOSITION AND COATING METHOD OF THE SAME

(57)Abstract:

PURPOSE: To obtain the subject composition giving a coated film having excellent stability and weatherability without coloring by containing a polymer having an acid anhydride group, a blocked hydroxyl group and an epoxy group, etc., a heat-latent curing agent, an ultraviolet light absorber, a light stabilizer or an antioxidant.

CONSTITUTION: This one package coating composition giving a coated film having excellent storage stability and weatherability without coloring is obtained by blending

(A) an oligomer or a polymer containing an acid anhydride group, a blocked hydroxyl group and an epoxy group as essential functional groups wherein these groups exist in a same or mutually different molecules with (B) a heat-latent curing catalyst comprising a complex of an organic metal compound with an electron donative compound or an onium salt and exhibiting the activity when heating, (C) a triazine-based or an oxalic acid anilide-based ultraviolet light absorber and (D) a hindered amine light stabilizer having a piperidine ring

expressed by the formula [R is R1CO or R1O (R1 is a 1-20C alkyl), a 2-20C alkyl; R2-R5 are each a 1-3C alkyl] or a phenolic antioxidant.
